PROJECTS

Ecommerce Website Design

Description: Designed and developed an eCommerce website to create an intuitive and visually appealing online shopping experience. Implemented user-centered design principles and collaborated with cross-functional teams to achieve project objectives.

Keeper Hospital Website Redesign

Description: Led the redesign of the "Keeper Hospital" website, aimed at enhancing the online presence and user experience for patients and healthcare professionals. The project focused on implementing modern design principles, improving accessibility, and streamlining the information architecture for easier navigation.

Crypto Wallet Mobile UI Design

Description: Led the UI design for a secure and user-friendly cryptocurrency wallet mobile application, enabling seamless management of various digital assets. The project focused on creating an intuitive and visually appealing interface while prioritizing security and privacy.
